

DTECHTRON

AI TOOLKIT

50 AI Tools for Students & Creators

A practical, beginner-friendly directory for studying, research, writing, design, content creation, and productivity.

FREE RESOURCE

Curated to help you discover useful AI tools faster and save time.

By Dtechtron • AI Tools | Smart Creator Tips

How to Use This Toolkit

Don't try to use every tool. Pick the tool that matches the job you need to complete. Start with the free option when available, test it on a real task, and keep the tools that genuinely save you time.

For students: Start with NotebookLM, Perplexity, ChatGPT, ChatPDF, Consensus, Elicit, and Gamma.

For creators: Start with Canva, CapCut, Descript, OpusClip, ElevenLabs, Ideogram, and Adobe Firefly.

For productivity: Start with Notion, Todoist, Zapier, Make, Motion, or Reclaim.

Important: AI products change quickly. Free-plan limits, features, pricing, and availability can change. Check the official website before relying on a specific feature.

Quick Categories

Category	Tools
Study & Research	ChatGPT, Gemini, Claude, Perplexity, NotebookLM, Consensus, Elicit, SciSpace, Scholarcy, ChatPDF
Writing	Humata, QuillBot, Grammarly, LanguageTool, Jenni AI
Presentations & Design	Gamma, Canva, Napkin AI, Beautiful.ai, Tome, Microsoft Designer, Adobe Express, Kittl, Ideogram, Leonardo.Ai, Adobe Firefly
Video & Content	CapCut, Descript, OpusClip, Runway, VEED, InVideo, ElevenLabs, HeyGen, Pictory
Productivity & Automation	Notion, Otter.ai, Zapier, Make, ClickUp, Todoist, Motion, Reclaim, ResearchRabbit, Connected Papers, Readwise Reader

1. ChatGPT

Best for: Study, brainstorming & writing

Why it's useful: Explain difficult topics, generate practice questions, brainstorm ideas, summarize material, and help structure assignments.

Official website: <https://chatgpt.com/>

2. Google Gemini

Best for: Research, brainstorming & Google ecosystem

Why it's useful: Useful for explanations, brainstorming, drafting, and working across Google's AI ecosystem.

Official website: <https://gemini.google.com/>

3. Claude

Best for: Writing, analysis & long documents

Why it's useful: Strong for drafting, editing, reasoning through documents, and turning complex material into clearer explanations.

Official website: <https://claude.ai/>

4. Microsoft Copilot

Best for: Everyday productivity

Why it's useful: Helps with writing, brainstorming, summarizing, and AI assistance across Microsoft products.

Official website: <https://copilot.microsoft.com/>

5. Perplexity

Best for: Research & source discovery

Why it's useful: Search the web with AI-generated answers and cited sources, making it useful for starting research.

Official website: <https://www.perplexity.ai/>

6. NotebookLM

Best for: Study notes & source-based learning

Why it's useful: Upload your own sources and ask questions, summarize material, and generate study-oriented outputs from them.

Official website: <https://notebooklm.google/>

7. Consensus

Best for: Research papers

Why it's useful: Search scientific research and get evidence-focused summaries grounded in academic literature.

Official website: <https://consensus.app/>

8. Elicit

Best for: Literature review

Why it's useful: Find and analyze academic papers and organize research findings for literature-review workflows.

Official website: <https://elicit.com/>

9. SciSpace

Best for: Academic papers

Why it's useful: Read, understand, and ask questions about research papers with AI assistance.

Official website: <https://scispace.com/>

10. Scholarcy

Best for: Research summaries

Why it's useful: Turn research papers and long documents into concise summaries and key points.

Official website: <https://www.scholarcy.com/>

11. ChatPDF

Best for: PDF Q&A;

Why it's useful: Upload a PDF and ask questions about its contents instead of manually searching through every page.

Official website: <https://www.chatpdf.com/>

12. Humata

Best for: Document analysis

Why it's useful: Ask questions about uploaded documents and quickly extract useful information from long files.

Official website: <https://www.humata.ai/>

13. QuillBot

Best for: Paraphrasing & writing

Why it's useful: Rewrite text, improve clarity, summarize content, and support writing workflows.

Official website: <https://quillbot.com/>

14. Grammarly

Best for: Writing improvement

Why it's useful: Check grammar, clarity, tone, and wording while drafting assignments, emails, and other writing.

Official website: <https://www.grammarly.com/>

15. LanguageTool

Best for: Grammar & style

Why it's useful: Grammar, spelling, punctuation, and style assistance across many languages.

Official website: <https://languagetool.org/>

16. Jenni AI

Best for: Academic writing

Why it's useful: Helps draft, organize, and refine academic writing and research-related content.

Official website: <https://jenni.ai/>

17. Gamma

Best for: Presentations & documents

Why it's useful: Create polished presentations and documents from a prompt or outline with AI assistance.

Official website: <https://gamma.app/>

18. Canva

Best for: Design & presentations

Why it's useful: Create presentations, posters, social graphics, and other visual content with templates and AI features.

Official website: <https://www.canva.com/>

19. Napkin AI

Best for: Visual explanations

Why it's useful: Turn ideas or text into diagrams and visual explanations that can make concepts easier to present.

Official website: <https://www.napkin.ai/>

20. Beautiful.ai

Best for: Presentations

Why it's useful: Build presentation decks with smart layouts designed to keep slides visually consistent.

Official website: <https://www.beautiful.ai/>

21. Tome

Best for: Presentations & storytelling

Why it's useful: Create AI-assisted presentations and visual stories from prompts and outlines.

Official website: <https://tome.app/>

22. Microsoft Designer

Best for: Quick graphics

Why it's useful: Generate and edit social graphics, posters, and visual designs with AI assistance.

Official website: <https://designer.microsoft.com/>

23. Adobe Express

Best for: Content design

Why it's useful: Create social posts, graphics, videos, and marketing assets with templates and AI-powered features.

Official website: <https://www.adobe.com/express/>

24. Kittl

Best for: Graphic design

Why it's useful: Design posters, social graphics, logos, and typography-heavy visuals with AI-assisted features.

Official website: <https://www.kittl.com/>

25. Ideogram

Best for: AI images & typography

Why it's useful: Generate images with a strong focus on text and graphic-design-style compositions.

Official website: <https://ideogram.ai/>

26. Leonardo.Ai

Best for: AI image creation

Why it's useful: Generate and edit images for creative projects, concepts, thumbnails, and visual experimentation.

Official website: <https://leonardo.ai/>

27. Adobe Firefly

Best for: Generative creative tools

Why it's useful: Create and edit images and other creative assets with Adobe's generative AI tools.

Official website: <https://firefly.adobe.com/>

28. CapCut

Best for: Video editing

Why it's useful: Edit short-form videos with templates, captions, effects, and AI-assisted editing features.

Official website: <https://www.capcut.com/>

29. Descript

Best for: Video & podcast editing

Why it's useful: Edit media through transcripts, clean up audio, and create content with text-based workflows.

Official website: <https://www.descript.com/>

30. OpusClip

Best for: Short-form video repurposing

Why it's useful: Turn longer videos into short clips and identify moments suited for short-form content.

Official website: <https://www.opus.pro/>

31. Runway

Best for: AI video creation

Why it's useful: Generate and edit video with AI tools for creative experiments, visual effects, and storytelling.

Official website: <https://runwayml.com/>

32. VEED

Best for: Online video editing

Why it's useful: Create and edit videos in the browser with captions, templates, and AI-assisted features.

Official website: <https://www.veed.io/>

33. InVideo

Best for: AI video creation

Why it's useful: Generate video drafts from prompts and edit them for social media and other content formats.

Official website: <https://invideo.io/>

34. ElevenLabs

Best for: AI voice & audio

Why it's useful: Create AI voiceovers and work with speech and audio for videos and other projects.

Official website: <https://elevenlabs.io/>

35. HeyGen

Best for: AI avatars & video

Why it's useful: Create presenter-style videos with AI avatars, voice options, and multilingual capabilities.

Official website: <https://www.heygen.com/>

36. Pictory

Best for: Video repurposing

Why it's useful: Create or repurpose videos from text and longer content into shorter, social-friendly formats.

Official website: <https://pictory.ai/>

37. Notion

Best for: Notes & productivity

Why it's useful: Organize class notes, projects, tasks, databases, and knowledge in one workspace with AI features.

Official website: <https://www.notion.so/>

38. Otter.ai

Best for: Transcription & meeting notes

Why it's useful: Transcribe conversations, lectures, and meetings and turn them into searchable notes.

Official website: <https://otter.ai/>

39. Zapier

Best for: Automation

Why it's useful: Connect apps and automate repetitive workflows so you spend less time on manual tasks.

Official website: <https://zapier.com/>

40. Make

Best for: Visual automation

Why it's useful: Build multi-step automations between apps using a visual workflow builder.

Official website: <https://www.make.com/>

41. ClickUp

Best for: Project management

Why it's useful: Manage tasks, projects, documents, and workflows with AI-assisted productivity features.

Official website: <https://clickup.com/>

42. Todoist

Best for: Task management

Why it's useful: Capture tasks, organize projects, and manage daily priorities with a simple task system.

Official website: <https://todoist.com/>

43. Motion

Best for: Planning & scheduling

Why it's useful: Combine tasks and calendars to help plan work and automatically organize time.

Official website: <https://www.usemotion.com/>

44. Reclaim

Best for: Calendar & time management

Why it's useful: Protect time for tasks, habits, and meetings by intelligently organizing your calendar.

Official website: <https://reclaim.ai/>

45. ResearchRabbit

Best for: Research discovery

Why it's useful: Explore academic literature through visual connections between papers, authors, and topics.

Official website: <https://www.researchrabbit.ai/>

46. Connected Papers

Best for: Paper discovery

Why it's useful: Visualize relationships among academic papers to discover related research and influential work.

Official website: <https://www.connectedpapers.com/>

47. Readwise Reader

Best for: Reading & knowledge management

Why it's useful: Save, highlight, organize, and revisit articles, PDFs, newsletters, and other reading material.

Official website: <https://readwise.io/read/>

Build Your Own AI Stack

A simple workflow is often more useful than having dozens of tools. For example:

Research → Perplexity / Consensus / Elicit

Study → NotebookLM / ChatGPT / ChatPDF

Write → Claude / ChatGPT / Grammarly / QuillBot

Present → Gamma / Canva / Napkin AI

Create → CapCut / Descript / ElevenLabs / Canva

Automate → Zapier / Make / Notion
